

KIPLAA POOL CENTRE

Project Source Context

Project Name

KIPLAA POOL CENTRE

Project Overview

KIPLAA POOL CENTRE is a real-money competitive pool gaming Android application where players challenge each other in pool matches using stake amounts deposited through M-Pesa.

Two players agree on a stake amount, deposit funds into the system wallet, and compete physically at a pool table. After the match ends, the winner automatically receives 75% of the total pooled amount while the platform retains 25% as commission revenue.

The app combines:

- Pool table management
- Real-money gaming
- Digital wallet system
- Matchmaking
- Tournaments
- Player rankings
- M-Pesa integration
- Real-time competition

The goal is to modernize local pool centres in Kenya by turning casual pool games into structured competitive earning opportunities.

Main Objective

To create a digital platform that:

- Allows players to earn money through pool matches
 - Helps pool centres manage games digitally
 - Generates platform revenue through commissions
 - Creates organized tournaments and rankings
 - Provides secure M-Pesa-powered transactions
-

Target Users

- Pool players
 - Pool hall owners
 - Tournament organizers
 - Competitive gamers
 - Betting/skill-game enthusiasts
-

Core Business Model

Match Stake Example

Player A:

- Deposits KES 50

Player B:

- Deposits KES 50

Total Pool:

- KES 100

After match:

- Winner receives KES 75
- Platform keeps KES 25

Commission Rate:

- 25%

Main Features

Authentication

- User registration
- Login system
- Phone number verification
- Password recovery

Wallet System

- M-Pesa deposits
- Wallet balance
- Withdrawals
- Transaction history

Match System

- Create challenge
- Accept challenge
- Stake confirmation
- Live score tracking
- Match result submission

Tournament System

- Paid tournaments
- Leaderboards
- Brackets
- Cash prizes

Rankings

- Player ratings
- Match history
- Win/loss records
- Achievement badges

Notifications

- Match alerts
- Deposit confirmations
- Tournament reminders

Admin Dashboard

- User management
- Match monitoring
- Withdrawal approvals
- Revenue analytics
- Fraud management

Revenue Streams

- 25% match commission
- Tournament entry fees
- VIP memberships
- Ads/promotions
- Table booking fees

Security Features

- KYC verification
- Anti-cheating system
- Match dispute handling
- Transaction verification
- Secure wallet system
- QR-based check-in

Recommended Technology Stack

Mobile App

- React Native

Backend

- Node.js + Express

Database

- PostgreSQL

Authentication

- Supabase

Payment Integration

- Safaricom Daraja API

Hosting

- Render Vercel
-

Future Expansion

- Multi-branch pool centres
 - AI score verification
 - Live streaming
 - National player rankings
 - Team competitions
 - Sponsorship system
 - Betting analytics
-

Vision Statement

To become the leading digital pool gaming and competitive earning platform in Kenya and Africa by combining sports, technology, and secure mobile payments into one seamless experience.
